

Dear Brisbane Bub Hub Listees,

The Bub Hub's server and network have been looked after for many years by **Unique Networks** which encompasses support, maintenance and system administration, www.uniquenetworks.com.au

Over that time our system requirements have changed significantly and Matt and his team have helped us every step of the way, from adding new computers to replacing servers and extending the network in the office.

It has been our experience that many small businesses (or those that started small and have grown quickly) often have not considered their IT systems, data protection and backup in particular! We have asked Matt to offer all Bub Hub listees that mention the Bub Hub a FREE systems review.

We strongly recommend anyone with a server (or thinking of getting a server) or more than 4 computers to contact Matt's team for a review.

We highly recommend **Unique Networks** to any business without an in-house nerd but with a business that relies on its data for success.

Regards,

Brad Lauder
